Fair, fast, borderless currency & crypto exchange

A modern desk for 70+ world currencies and crypto.

The problem

Why people overpay

Traditional banks bury their margins in poor exchange rates.

Cross-border transfers are slow - days, not minutes.

Hidden charges and no transparency on the true rate.

P2P and crypto swaps carry counterparty risk.

Our solution

A transparent, escrow-protected desk

TFE settles fast and protects both sides.

Live, mid-market-truthful rates on 70+ currencies + BTC / ETH / USDT.

Settlement in minutes, not days.

Escrow on every trade - funds released only on confirmation.

Peer-to-peer marketplace with ratings, chat and disputes.
